

PRESS RELEASE

During this year's Advanced Training event for distributors at CENTA's headquarters in Haan, the management of Christie & Grey and CENTA announced a future cooperation between their companies.

Christie & Grey considers the CENTA product range to be an excellent complement to its own portfolio. The agreement will enable both companies and CENTA's worldwide distributors to offer packaged solutions of flexible couplings and anti-vibration mounts to their customers. These solutions are supported up by state-of-the-art six degree of freedom analysis of the complete elastic system in order to optimize the matching of the components.

Both companies are well-established and each have a worldwide reputation for quality products and solutions. Christie & Grey have been pioneers in the development and manufacture of durable and highly efficient vibration, noise and shock control solutions for worldwide applications. With more than a century of experience they have become a leading manufacturer of customized products, able to handle the most complex demands from modern engineering projects.

The CENTA international group has been engaging in solving complex drive train and torsional vibration challenges since 1970. Due to its numerous innovations, the company today ranks among the world's leading manufacturers of flexible couplings and drive shafts for industry, marine and rail applications as well as for power generation.
